China can host an Olympics yet has not a single animal welfare protection law. Concerned, campaign group One Voice sent a team to investigate China's dog meat trade. This is the disturbing footage they brought back. Warning: includes harrowing scenes of dogs being beaten and stabbed. Children in particular should not view it.

Please visit One Voice (link to [http://www . onevoice-ear . org/combattre/petitions/petition_chine_english . html](http://www.onevoice-ear.org/combattre/petitions/petition_chine_english.html)) to sign our petition calling for China to introduce animal welfare legislation that would ban such cruelty.
